- ◆ Become familiar with safety issues at work locations.
- ◆ Understand the individuals and organizations that pose a threat to Industrial and Commercial locations.

## Program Overview

Industrial and commercial locations are the heart of the American economy. With 85% of the critical infrastructure in the U.S. held by private organizations, industrial and commercial locations are the heart of America. They serve as a foundation for the American economy and provide jobs for millions of Americans. In the 21<sup>st</sup> century, the rise of security breaches and safety problems has increased in the nation at these vital locations. Today, the possibility of a criminal activity occurring from an outsider or a current employee is greater than ever before. Workplace violence, theft, white collar crime, espionage and terrorism are real possibilities. American workers are also at risk of facing more environmental hazards and various safety threats. Failure to understand safety threats for workers in industrial and commercial locations only results in increased liabilities and lawsuits from injured workers.

The Spy-Ops Industrial Safety and Security program provides some of the most advanced information on how to protect the physical locations and workers at industrial and commercial locations. Our materials are written by experts in industrial security and workplace safety as well as experts in security threats facing American businesses. Our organization has created one of the most sought after certifications for one of the most difficult subjects to learn.

Our program consists of 10 modules that take approximately 1 1/2 hours to complete. The program sells for \$99.95 and can be ordered via the **Spy-Ops** web-site, delivered via CD or an email that contains all necessary materials in Adobe Acrobat format (PDF). Once completed, the participant takes a comprehensive exam and submits it for scoring. If successful, they receive a Certificate in Industrial Safety and Security.

*"With the (Spy-Ops) training brief segments on Improvised Explosive Devices, Biological Warfare, Chemical Warfare, and Terror related material, I must say that the information has really been a great addition to what I've learned from my agency."*

*Henry Budhram Jr.*

*Transportation Security Administration  
Department of Homeland Security*

**FACT:** Environmental Extremists and Terrorists both target industrial facilities making them a primary high risk high value target.

The tangible benefits of continuing professional education include career advancement, professional recognition, personal safety, job security and the list goes on. Additionally, our extensive product offering includes over 70 individual briefs to support the specific interests of our customers. We will also create custom training briefs and on-site programs upon request.

Security and safety problems occur everyday at industrial and commercial locations in the U.S. Failure to properly train personnel will result in liabilities and injuries. **Order Now!**

## Quote

"I found the White Collar Crime training brief to be very in-depth and informative. The inclusion of the types of white collar crime, white collar crime schemes and a summary aided my understanding of this costly type of crime. The exam and online exercise prompted me to do more research and attain an even greater understanding of the subject of white collar crime."
