

Counter-Terrorism CBRNE

Chemical, Biological, Radiological, Nuclear and Explosives

Curriculum

1. Chemical Weapons
2. Biological Warfare
3. Radiological Weapons (Dirty Bombs)
4. Nuclear Weapons
5. Explosive Devices
6. Improvised Explosive Devices
7. Terrorism Strategies & Tactics
8. Terrorism Awareness

Program Objectives:

- ◆ Understand the basics of terrorism.
- ◆ Understand strategies and tactics of terrorists.
- ◆ Understand the use of chemical, biological, radiation, nuclear and explosives as weapons of attack.

Program Overview

CBRNE is an acronym referring to Chemical, Biological, Radiological, Nuclear, and Explosives. It is in common use worldwide to refer to protective measures taken against CBRNE weapons or hazards. The evidence of al-Qaeda's interest in conducting a terrorist attack with chemical, biological, radiological, nuclear, and explosives (CBRNE) weapons appears compelling. The threats made by terrorists have been backed up by their deeds. Training is required covering the types of weapons first responders may be exposed to in a terrorist attack. Responders need to be ready to deal with any possible situation quickly, efficiently and professionally.

Spy-Ops' Counter-Terrorism CBRNE course is designed to equip military and civilian first responders. This training is needed by law enforcement and many diverse workers including drivers, loaders/unloaders, vehicle maintenance workers, warehouse workers, truck stop personnel, dispatchers, security personnel, engineers, conductors, car men, track and signal workers, in-plant rail workers, and yardmasters. Participants stressed that many workers have received basic health and safety training but lack CBRNE knowledge.

FACT: With every tick of the clock we come one step closer to the next terrorist attack. Chemical, biological, radiological, nuclear, explosive or improvised explosives are the most likely weapons of choice for this inevitable event.

This course provides military and civilian personnel and management professionals with skills, knowledge, and the information resources to carry out their responsibilities in the event of a chemical, biological, radiological, nuclear, explosive, or improvised explosive event. The program is delivered on CD or electronically, and includes eight modules that take approximately 16 hours to complete. Once you pass all eight exams, you will receive a Certificate in Counter-Terrorism CBRNE.

Additionally we provide incident management templates and software. Our templates help you control and manage emergency scenes and events. We have special templates for chemical, biological, nuclear, radiological and explosives attacks by terrorists. Are you prepared if terrorists attack using CBRNE weapons?

*"I am very satisfied with the CBRNE program – Great Course."
A. Bankey, County Sheriff*

Those responding to attacks by terrorists and extremist groups must be trained in CBRNE. **Order Now!**

Counter-Terrorism CBRNE

Chemical, Biological, Radiological, Nuclear and Explosives

Quote

"With the (Spy-Ops) training brief segments on Improvised Explosive Devices, Biological Warfare, Chemical Warfare, and Terror related material I must say that the information has really been a great addition to what I've learned from my agency. The (Spy-Ops) briefs provided exactly what I wanted to know, the way it has affected us, and either technological or current methods to resolve these complicated issues."
